

## **Kentucky Women's Cancer Screening Program Audit Reports**

---

**323 (Cervical Screening Report):** This report will list the Pap and HPV tests performed through your department and reported through the Patient Encounter Reporting System (PERS) or Supplemental reporting system. This report was formerly called the Pap log report.

**676 (Breast Screening and Diagnostic Report):** This report will list the screening and/or diagnostic mammograms and ultrasounds referred through your department and reported through the Patient Encounter Reporting System (PERS) or Supplemental reporting system. This report was formerly called the Mam log report.

**1709 (BC Screen Missing Data Report):** This report will list all breast and cervical cancer records that have incomplete data and records that need to have BC data collection screens.

**1706 (Breast Final Diagnostic Pending Report):** This report will list all diagnostic pending records for breast cancer. To complete these records data from the ACH-58 form must be entered on the BC screen. The records from this report will be dropped only after the required data is entered on the BC screen.

**1707 (Cervical Final Diagnostic Pending Report):** This report will list all diagnostic pending records for cervical cancer. To complete these records data from the ACH-58 form must be entered on the BC screen. The records from this report will be dropped only after the required data is entered on the BC screen.

### **New Reports**

**2646 (Cervical Lost to Follow-up or Refused):** This report will list all the cervical cancer BC records that have been reported to the KWCSF either as Lost to Follow-up or Work- up Refused. This report will help you track the number of women who had an abnormal Pap test but did not receive the required follow-up. These women are at high risk of developing cervical cancer.

**2647 (Breast lost to Follow-up or Refused):** This report will list all the breast cancer BC records that have been reported to the KWCSF either as Lost to Follow-up or Work- up Refused. This report will help you track the number of women who had an abnormal Clinical Breast Exam or mammogram, but did not receive the required follow-up. These women are at high risk of developing breast cancer.

**2648 (Never or Rarely Screened Report):** This report will list all KWSCP women with a BC record who received a pap test through your LHD, but previously were never or rarely (5 or more years) screened for cervical cancers. Please talk to your department's HIPAA privacy officer before you share any part of this report with your cancer coalitions.

**2649 (Duplicate MDE records Report):** This report will list all MDE duplicate records that need to be corrected.

## Kentucky Women's Cancer Screening Program Audit Reports

---

**2654 (Duplicate CPT codes):** This report will list all the duplicate CPT codes reported in the PSRS system. These duplicate records must be corrected.

**Note:** The BC record will only be created on women who are between ages 40-64, at or below 250% poverty guidelines and have NO Medicare, Medicaid, or any private health insurance or other third party payors (i.e. Susan G. Komen, Avon foundation etc.,).

Please let me know if you have any questions or concerns about any of these reports. These reports are works in progress and with your input these reports will help to increase the quality of care to the patients you see as well as gather the data information needed to continue to receive funding from the National Breast and Cervical Cancer Early Detection Program.
